Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 08 December 2006.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Note: This is in response to an Amendment filed 12/08/2006.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 34, 37-54, and 57-64 are rejected under 35 U.S.C. 102(e) as being anticipated by Porthouse et al (Des. 130,791).

As to claims 34, 37-40, 43, 45-48, 52, 54, 57, 58, and 60-63, Porthouse et al discloses in figured 1 and 2, a tapered stem; an areola region connected to the proximal end of said stem; and a bulbous region being connected to said areola region, wherein said areola region is substantially concentrically aligned with said bulbous region when viewed in a top view and wherein said proximal end of said stem has opposing sides with inwardly concave shapes when view in a front view; an annular edge disposed between said areola region and said bulbous region; and further comprising a flange; and wherein said areola region and said proximal end of said stem are connected along an inwardly concave surface and wherein said inwardly concave surface (at 46) is also considered to be smooth.

As to claims 41, 42, 44, 49, 51, 53, 59, and 64, wherein said areola and bulbous regions and stem as disclosed by Porthouse et al appears to have dimension as claimed, due to its being used on baby's mouth.

Response to Arguments

1. Applicant's arguments filed 12/08/2006 have been fully considered but they are not persuasive. With respect to claims 34 and 57, the Examiner disagrees with Applicant's remarks that none of the figures as shown in the patent to Porthouse has any type of orifice on the stem and that the stem as disclose in Porthouse does not have an inwardly tapered toward its distal end. The type of nipple as disclose in Porthouse is clearly considered a orifice nipple and that the nipple of Porthouse is clearly having an inwardly tapered toward its distal end (as shown above drawing). With respect claims 41, 42, and 44, applicant argues that Porthouse does not show the nipple with any sort of dimension. However, stem as disclosed by Porthouse et al appears to have dimension as recited in the claims due to its being used on baby's mouth, a recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. The Examiner has

maintained the ground of rejection under 35 U.S.C. 102 (b) as being anticipated by Porthouse for the reason as set forth in the above statement.

Conclusion

2. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
